STAT

PLANS AND PROGRAMS STAFF WEEKLY REPORT FOR
PERIOD ENDING 2 NOVEMBER 1983

1.  **Progress Report on Tasks Assigned by the DCI/DDCI:**

No tasks assigned during this reporting period.

2   **Items or Events of Major Interest that have Occurred
During the Preceding Week:**

a.  **LIMS**

(1)  A successful System Definition Review (SDR)
was conducted on 27 October.  Booz-Allen and Hamilton's
presentation of how system requirements will be accom-
modated in various Computer Program Configuration Items
(CPCIs) was well received.  The Government Caucus
resulted in agreement that the goals of the system
definition phase of the LIMS project had been met.  BAH
will now move into the preliminary design phase of the
project with the Preliminary Design Review scheduled for
late February 1984.

(2)  Proposed revisions to the LIMS System
Objectives document, as prepared by OL and OF, are
complete and will be submitted to the LIMS Project
Manager this week.  The LIMS Quality Assurance Group
(QAG) will audit these changes and evaluate associated
DR resolutions.  Upon approval of the document, it will
be baselined through standard QA procedures.

b.  **Data Administration (DA).**  Work began in earnest
this week to implement the DA function and organization.  A
series of tasks have been identified and initiated that will
formally establish this operational activity.

c.  **Overseas Personal Computer (PC) Project.**  C/SAB/P&PS
provided a demonstration of ASAPS development, using the
STAT    CONDOR DBMS on a Wang PC, to Messrs. [                    ]
The developing capability reflects excellent progress to
STAT    date. [                ] has been tasked to define requirements for
a versatile inventory package, for use in connection with the
ASAPS property accountability feature.  A cable to field Log
officers will be generated advising them of this progress.

SUBJECT: Plans and Programs Staff Weekly Report for the Period
Ending 2 November 1983

STAT

Systems Analysis Branch/P&PS/OL
WEEKLY STATUS REPORT
Week of 24 to 28 October 1983

I.    Major Activities During the Past Week:

A. Support to OL:

        FARS (Federal Automated Requisitioning System).  The IDSBSTAT
program was modified.  The variables used to total the statistics
were increased in size, and the variable which is used to
calculate the days in a month was changed to accept the values
from 28-31.  The IDSBSTAT program will be moved over to production
STAT    this week.

        The microfiche process will begin next week.  Samples from the
report produced by the PLI program have been microfiched and it
looks good.  The customer is reviewing the microfiche and if they
are satisfied the complete microfiche process will begin next
STAT    week.

        REALESTATE (Realestate System).  The following work items
were completed in support of the Records & Files Unit/Realestate &
Construction Division:

STAT

        INFO (INFO Applications).  Personnel & Training Staff, OL,
requested a change to the PERS-MOVES INFO file to add three new
fields to the end of the file.  Generally, an INFO file cannot be
modified that contains data; however, a technique was used that
involved redefining the information in the current file, copying
the file definitions to a temporary file, adding the three new
field definitions to the temporary file, then moving the
information from the current file to the temporary file.  Finally,
erasing the current file and renaming the temporary file to PERS-
STAT    MOVES.  This process was completed on 27 October.

        ICS (Inventory Control System).  The processing of "OU"
transactions has been corrected.  This problem had been of
critical importance to the OL/ICS/DBM.

STAT

PAC codes "IAD" "912" and "955" were added to the ICS/COMMIT/DICT on both development and the production data bases.

STAT

Problem reports which dealt with the deletion of offline Activity records prior to '79 and changing a message on the 1-P menu were completed.

STAT

CONIF (Contract Information System). S/EDITs on the AM/PR/UNIT attribute in the AMENDMENT dictionary and the WO/PR/UNIT attribute in the WORK/ORDER dictionary were changed to allow for input of amendment and work order data by the IAD Contracting Team.

II.   General Items:

None to report.

III.  Problems:

None to report.

IV.   Upcoming Events:

None to report.
